RAISING MUTLIPLE LOG BOOK ENTRIES TO SAME JOB NO

These notes set out how to raise multiple Log Book Entries (L.B.E.'s) to the same Job Number. This would well be the case where the Job is on different trades and there is a need to create different LBE's for the variances in the Trades

1. Enter the first Trade to filter on the Job number being called:

(it assumed that you tasks have been set with appropriate trades e.g. 'AF', 'EN' etc

2. Select 'Link to Job No'

3. System will extract on the "AF" items, Edit and change numbering system if needed

(Note: Above is displayed in "Browse" mode....

4. Finalise the Edit for this Trade and complete the process to print the LBE
