

RE-ASSIGN TASKS & ASSOCIATED COSTS TO DIFFERENT ACCOUNT

There are occasions when you might want to re-assign certain tasks and associated costs from one Job Number to another. This might be the case where there are certain tasks that are a Warranty claim and thus the costs borne need to be passed on to a different Account for Invoicing purposes, but yet retain the original data for historical purposes in the original job but at zero costs.

To do this you will need an additional Warranty Job Number to the original Job Number. This Warranty Job number would be opened to the Account of the person/company accepting the Warranty (same Aircraft Regn required). Then from "Prepare Billing" within the original Job, you select the task you wish to re-assign as follows:

ORIGINAL JOB NUMBER
