

CAFAM - TECH NOTES NO 25

01 Oct 2011

CAFAM ADDITIONAL FONTS NEEDED – BARCODE etc

1. INTRODUCTION

CAFAM is programmed to print Code 39 Barcodes on labels and on WorkCards. The fonts used however are not included in Windows as a standard supplied font. These fonts are however supplied with the program and are located in the CAFAM folder. They have to be installed on each workstation as and where needed

2. SETTING IT UP

1. Log in as Administrator (or with Administrator privileges)
2. Open the CAFAM folder and locate the following True Type Fonts (.TTF) files that you will find present in the folder:

FREE3OF9.TTF

BARCOD39.TTF

PASSWORD.TTF (optional – sets up a different appearance at CAFAM Login)

3. Copy these three files into your C:\WINDOWS\FONTS
4. The next time CAFAM launches, the fonts should insert themselves and print the Barcodes as expected
