

RESETTING THE OPENING FIGURES FOR FLIGHT LOG

OPEN THE DATA FILE – FTECHLG.DBF

USE THE FIND FUNCTION TO LOCATE THE AIRCRAFT e.g. S7-AAR

[illegible]

TAB ACROSS TO TOTAL COLUMN

The screenshot shows the CAFAM for Windows application. The 'Utilities' menu is open, displaying options: Repair Files, ReIndex Files, Fix Data Files, Repair Memory File, and Repair Data in File. The 'Ftechlg' table is visible, showing flight data. A black arrow points from the 'Totlndg' column of the first row to the 'Totlndg' column of the last row, indicating a tab across to the total column.
