

CHANGING YOUR MEL CODE IN AIRCRAFT RECORDS

The "MEL Code" file is not part of the normal "Control Files" in the "Utilities". If for some reason you need to Edit (or Add) to the file, then the only way this can be achieved is to use the function of "Repair Data in File". To do this, go to

- Utilities
- Repair files
- Repair Data in file

SELECT A TABLE CALLED FPIREPS

SCREEN CHANGES TO ABOVE – ADD/EDIT AS REQUIRED

(NOTE: The Tag Column "MEL" is required for any additions so that only Tagged items="MEL" will pop-up during program operation)
